```
#include <iostream>
#include "randomfile.h"
using namespace std;
void writeFile(string filename){
    RandomFile file(filename);
    Record record;
    for(int i=0;i<4;i++){
        record.setData();
        file.write(record);
    }
}
void readFile(string filename)
    RandomFile file(filename);
cout<<"---- show data --- \n";</pre>
    file.scanAll();
    cout<<"---- show sorted data --- \n";
    file.scanAllByIndex();
    file.searchByKey();
int main(){
    writeFile("data.dat");
    readFile("data.dat");
}
```
